FOR IMMEDIATE RELEASE

New Case of COVID-19 Reported In Chambers County

Chambers County, TX – Chambers County Public Health (CCPH) is reporting a new case of COVID-19 in Chambers County. The female patient is between 40-50 years old, lives in West Chambers County, is at home, isolated, and in stable condition. Due to patient privacy, no other information will be released. Her case is NOT travel related. She will be monitored by Chambers County Public Health staff.

Epidemiology investigators and public health staff will perform investigations, surveillance, and interviews with this patient; and will identify individuals who potentially are associated with this case. Those identified to be at possible risk of contact, exposure, or infection will be contacted for further case investigation.

Health Services Director Mary Beth Bess advises “we ask our community to continue to stay home and stay safe. The protective measures Judge Jimmy Sylvia has implemented are to protect our County from community spread. Please do your best to do your part to protect each other.”

Chambers County Public Health states that along with DSHS and other healthcare partners, they will continue to monitor COVID-19 in the County to prepare for the possibility of more cases. They recommend following all published guidance by the CDC, as well as guidance published locally by Chambers County. This includes social distancing, following the Stay Safe Orders issued by Judge Sylvia, proper hygiene, and staying at home and away from others when mildly sick. Contact the Public Health Department (409) 267-2731 with questions, calling your PCP, or visit:
