

# HURRICANE HARVEY REGISTRY

## **PUBLIC HEALTH EMERGENCY PREPAREDNESS**

On November 6, 2018 Chambers County partnered with Rice University's [Hurricane Harvey Registry Project](#). The project is a Gulf Coast Region initiative to survey those individuals and families that were and were not impacted by Hurricane Harvey. The project collects health, location, and exposure information to help identify health trends and risks associated with Hurricane Harvey. The

information in the registry will help understand the health impacts of Hurricane Harvey in Chambers County. The registry will also support planning for future natural disasters and policy making by county officials. To access the registry and get answers to frequently asked questions please click the link [here](#) or in the paragraph above.
